ABOUT US

Dear Customers,

Since the founding of our company in 1899, successive generations of people associated with Fagum Stomil have worked hard to meet the expectations of our customers. With 120 years of experience, we have built a legacy of which we are extremely proud. Based in Poland and operating with 100% domestic capital, we design and manufacture professional, protective, fishing, hunting, and general-purpose footwear.

Our shoes are used in practically every field of human activity, including the processing and chemical industries, energy, mining, construction, transportation, as well as agriculture, horticulture, forestry, hunting, and fishing. We also supply footwear for uniformed and medical services. We offer footwear made of natural leather and synthetic leather. Most of our production is carried out using the highly durable direct injection method, but we also use other technological solutions.

Many years of experience, rich human capital, modern machinery, investment in innovative technologies, and a constant desire for development are the factors that make us a reliable and predictable business partner. Top quality, careful workmanship, durability, and comfort of use are the key characteristics of our footwear, thanks to which we have earned the trust of many customers in Poland and other European countries.

The quality of our products is also confirmed by the prestigious awards and distinctions we have received, such as the Lublin Brand Certificate, Business Gazelles, and the MTOP Gold Medal at the SAWO International Trade Fair for Work Protection, Firefighting, and Rescue, for our Monster Wellington boots made of innovative TRC material.

I LIKE IT RECYKLING

Through our company's recycling, we contribute to improving the environment while creating high-quality products.

Our **ACTL - ACTIVE CROSS LINKING TECHNOLOGY** uses recycled PVC materials from various industries, as well as from post-consumer wellingtons themselves. Products bearing our special Eco logo are made from materials that have been recycled, preventing them from ending up in landfills or incinerators.

We are constantly developing and improving a closed-loop system for our customers, enabling used PVC wellingtons to be returned to us. This way, conscious consumers can make a significant difference and help protect the environment.

For more information, please contact our team.

Height: **40 cm**

Weight: **approximately 1,8 kg**

The TRC (Thermo Rubber Compound) line – featuring the Monster, Hubert, and Slovak models is designed using Light-Tech technology, combining years of expertise in rubber and EVA boot manufacturing.

By merging the most durable elastomer – rubber – with an ultra-lightweight, waterproof EVA copolymer, we have created TRC: the ultimate fusion of strength and performance.

Every TRC model offers exceptional resistance to abrasion, tearing, and repeated flexing, ensuring long-lasting durability in even the toughest conditions.

With protective toe caps, puncture-resistant insoles, and SRC-rated slip resistance, these boots provide maximum safety. The Monster's rugged outsole, inspired by 4x4 tire treads, delivers unmatched grip and stability, making TRC boots a top alternative to PU footwear.

ESD electrostatic discharge

ESD stands for Electrostatic Discharge, and it refers to the phenomenon of electrostatic discharges that can occur in various situations, including when wearing footwear. ESD footwear is a type of shoe specifically designed to control electrostatic discharges.

The primary purpose of ESD footwear is to minimize the risk of damaging electronic devices or other components sensitive to electrostatic discharges while working in environments where such devices are present.

Common applications include work in electronic laboratories, electronics manufacturing plants, or other areas where electrostatic discharges could be problematic.

ESD footwear typically contains special materials or layers that help dissipate electrostatic charges from the worker's body to the ground, thereby reducing the risk of damaging electronic components.

These shoes may have conductive soles or be made from antistatic materials.

In summary, ESD footwear is an important element of quality control in workplaces where electrostatic discharges could pose a risk to electronic equipment.

ESD-labeled footwear, regardless of its antistatic properties, is electrically dissipative footwear that prevents the buildup of electrical charges on the human body by dispersing them through the system: person-footwear-floor.

Innovative cord lacing for quick on/off and perfect fit
Ventilation elements on the sides
Reinforced toe cap

WATER REPELLENT

Experience next-level comfort with our latest-generation breathable material, designed to adapt perfectly to the shape of your foot. Crafted with cutting-edge technology and certified by **OEKO-TEX® STANDARD 100**, this innovative fabric creates an invisible shield against moisture, **keeping water out while maintaining breathability**. Resistant to short-term surface exposure to water, it ensures all-day protection and ultimate ease with every step.

BREATHABILITY AT ITS BEST

Engineered for peak performance, our advanced **3D Aramid** fabric features a highly breathable structure that ensures constant airflow. It efficiently wicks away moisture and vapor buildup inside the shoe, **keeping your feet fresh and dry**. No overheating, no sweat—just all-day comfort with a perfectly ventilated interior.

UNMATCHED LIGHTNESS

Innovative footwear construction delivers extraordinary lightness. The advanced 3D spacer knit and streamlined design **eliminate unnecessary weight**, reducing the shoes to an absolute minimum. Each shoe, without the insole, **weighs just 300g**, offering an effortless, barely-there feel with every step.

DURABILITY & ENDURANCE

The reinforced sole with a Kevlar insole offers exceptional puncture resistance, while the composite **toe cap ensures maximum protection** against mechanical impacts. This advanced construction **extends the shoe's lifespan without compromising flexibility or its lightweight feel**, keeping you safe and comfortable throughout the day.

ERGONOMIC & MODERN DESIGN

Crafted with attention to every detail, shoes from the **ULTRA BREATHABLE** line offer a sleek, sporty look with reflective 3M Scotchlite™ elements to enhance visibility in low-light conditions. Perfect for environments with high temperatures, where foot discomfort is a concern. **These shoes offer the level of relief your feet need**, ensuring maximum ease even in the most challenging conditions.

SHIELD SPECIAL TOE PROTECTION

Additional reinforcement around the toe area **strengthens the upper fabric, improving its wear resistance**. The seamless application of durable material extends the lifespan of the shoe, **providing exceptional protection** during the toughest tasks in your daily work. This innovative feature ensures the toe cap withstands wear and tear, keeping your shoes in peak condition for longer.

AIR FLOW

With advanced **Airflow Technology**, these shoes are built to keep your feet cool and dry all day long. **The innovative, breathable design allows air to flow freely**, preventing heat buildup and moisture accumulation. Every step provides a refreshing, comfortable feel, ensuring **your feet stay dry and comfortable**, even in the most demanding environments.

MAXIMUM COMFORT

Lining is crafted from fully breathable **ON STEAM** material, which feels as soft as leather. **This innovative lining boasts 10 times the water absorption capacity** of its own weight, soaking up moisture in under 2 seconds! Experience exceptional comfort and dryness, even in the most demanding conditions.

Color: olive

Height: 31 cm

Weight: approx. 1.8 kg

6271 LEŠNIK ●

ISO 20347: 2012 OB FO CI SRC

Material: rubber

Lining: felt

Collar: waterproof material

Montage: vulcanization forms

Sizes: 39-47

Color: black

Height: 37 cm

Weight: approx. 2 kg

Art. 12 Contribution to warming ●

Material: felt incombustible
 Sizes: 39-47
 Color: white
 Supplementary equipment for firefighter footwear

Art.14 Insulating insert ●

Material: felt
 Sizes: 36-42
 Color: white
 Complementary equipment for wellingtons for the food industry, article 13012 PRO

Art.25 Insulating insert ●

Material: felt
 Sizes: 39-47
 Color: black
 Men's work wellingtons equipment

OEKO-TEX®
 CONFIDENCE IN TEXTILES
 STANDARD 100

Art.15 Insulating insert ●

Material: felt
 Sizes: 39-46
 Color: white
 Complementary equipment for wellingtons for the food industry, article 13012 PRO

Art.23 Insulating insert ●

Material: felt
 Sizes: 36-42
 Color: black
 Footwear equipment art. 13121, art.13221

Art.27 Insulating insert - VERONA ●

Material: felt
 Sizes: 36-42
 Color: black
 Complementary equipment for wellingtons EVA women's wellingtons, art. 53011 Verona

Art. 28 Insulating insert - TORINO ●

Material: felt
 Sizes: 40-47
 Color: black
 Complementary equipment
 for men's wellingtons Eva art. 56011 TORINO

Art. 26 Insulating insert for Woder footwear ●

Material: felt
 Sizes: 39-48
 Color: black
 Equipment for footwear Woder type,
 art. 819, 820, 821, 822

Art. 29 Insulating insert - MONSTER ●

Material: felt
 Sizes: 40-47
 Color: black
 Complementary equipment
 for men's wellingtons Eva art. 56505, 56506, 56511

Art. 30 Insulating insert - SLOVAK ●

Material: felt
 Sizes: 40-47
 Color: black
 Complementary equipment
 for men's wellingtons Eva art. 56411 SLOVAK

Art. 31 Insulating insert - SLOVAK ●

Material: felt
 Sizes: 40-47
 Color: white
 Complementary equipment
 for men's wellingtons Eva art. 56431 SLOVAK

Art. 32 Insulating insert - HUBERT ●

Material: felt
 Sizes: 40-47
 Color: black
 Complementary equipment
 for men's wellingtons Eva art. 56431 HUBERT

Art. 39 Insulating insert - TERMINATOR ●

Material: felt
 Sizes: 37-50
 Color: black
 Accessories for men's wellingtons
 PVC art. 13159, 13160, 13161, 13162

Art. 40 Profiled insert ESD ORTHOLITE ●

PN-EN 61340-5-1:2017

Material: POLIYOU+ORTHOLITE+ESD
 Sizes: 35-48
 Color: yellow
 Additional assets:
 - air circulation
 - antibacterial
 - moisture wicking
 - antifungal

Art. 43 Universal insert ●

Material: latex
 Sizes: 36-46 (to be cut)
 Color: black
 Thickness: 3 mm
 Additional assets:
 - active carbon
 - antibacterial
 - quick-drying
 - antifungal
 - odor absorbing

Art. 40 Profiled insole ● stitched with antistatic thread

Material: EVA
 Sizes: 35-48
 Color: black/yellow
 Additional assets:
 - antistatic
 - air circulation

STANDARD
100

Art. 34 Insulating insert ●

Material: **felt**
 Sizes: **35-48**
 Thickness: **6 mm**
 Grammage: **350 g/m2**
 Color: **graphite**
 Additional assets: **thermal insulation**

Art. 37 Warming insert ●

Material: **felt + natural wool**
 Sizes: **36-47**
 Thickness: **6 mm**
 Grammage: **750 g/m2**
 Color: **graphite/ecru**

Art. 33 Insulating insert ●

Material: **felt**
 Sizes: **35-48**
 Thickness: **5.5 mm**
 Grammage: **650 g/m2**
 Color: **graphite**
 Additional assets: **thermal insulation**

Art. 44 contoured insole ● with variable density ESD ATF ORTHOLITE PN-EN 61340-5-1:2017

Material: **PU/PU (sole) + Ortholite (insole)
 + ESD + hygienic fabric**
 Sizes: **35-48**
 Color: **Grey**
 Thickness: **3.5-8 mm**
 Weight: **Approx. 0.6 kg**
 Additional features:
 - **Contains active carbon and biocides,**
 - **anti-static (ESD),**
 - **antibacterial,**
 - **antifungal,**
 - **moisture-wicking,**
 - **good air circulation,**
 - **heel energy absorption**

Uwaga:

*Aby prawidłowo dobrać rozmiar obuwia, należy zmierzyć długość swoich stóp.

Sugeruj się zawsze pomiarem większej stopy.

*Do pomiaru większej stopy dodaj 0,5- 1 cm

*Odszukaj odpowiedni rozmiar dla siebie według powyższych tabeli.

Notes

ULTRA *breathable*

Unprecedented lightness,
incredible comfort,
ultra-breathability
and super durability
at every step

This footwear is perfect
for warehouses, distribution
centers, food discount stores
and other large-scale facilities

Upper made of technical
ARMID 3D material, resistant
to contact with liquids
